 **FEDERAL**
— BRACE —

PROUDLY MADE IN *America*

FEDERAL BRACE WAS STARTED IN 2009 by brothers with a background in custom metal manufacturing. We started out in the basement of an old cotton mill in Belmont, NC. Originally, we provided solutions for short run production. A customer would come to our door and inquire about a design, oftentimes sketched out on a piece of paper. We would help these customers turn their concepts into physical products.

At the time, no one offered any type of online marketplace for countertop support brackets. We saw an ever-increasing demand for stylish, sleek brackets to enhance home decor while providing substantial carrying capacities. The desire to provide solutions for designers, contractors and homeowners in this market birthed FederalBrace.com.

We entered into the KBIS trade show in 2010 with a few designs and had customers packing into our 10x10 booth. The demand we saw helped us to understand the need in the market. We began developing never-before-seen solutions in the industry. With innovation at the forefront of our success, we created the first comprehensive countertop support product line including: hidden, low profile, counter-mounted standoffs and elevated countertop supports.

Being the first to market, we understood the importance of providing resources to assist the end users. Fortunately, our expertise in metal manufacturing and engineering allowed us to develop resources useful in specification and installation of countertop supports. Our objective was not only to set the standard for innovation in the industry but also to help people. Innovation and liberating knowledge are key components of our core values along with a dedication to Made in the USA.

The future for Federal Brace is bright. We are branching out to new product lines like shelving systems, bench and vanity support products. We are adding new materials and continue to enhance functionality to all of our products. Thank you for supporting Federal Brace and our Made in the USA products. We look forward to serving you on your next project.

MANTEL BRACKETS + WOOD CORBELS

“ SOLID HIGH QUALITY AMERICAN MADE. BEING A RETIRED TOOLMAKER I HAVE GREAT APPRECIATION FOR PRECISION MANUFACTURING.

Roger R. | FLORIDIA

OUR FLOATING MANTEL BRACKETS are the perfect solution for supporting your heavy beam mantel over your outdoor or indoor fireplace. We offer many different mantel shelf bracket styles, each offering a slightly different design element. Whether you're looking to achieve a minimal or a more decorative look, we have the mantel mounting brackets to meet your needs.

DECORATIVE WOOD CORBELS have long been a staple in home design. Federal Brace innovated the beloved wood corbel with our mounting system that adds a weight-bearing function. Expanding on the weight-bearing design, we developed wood corbels with a rib mount system, which gives each corbel a carrying capacity of up to 375 pounds when installed in a stud or blocking.
